RFP Issue Date: **March 8, 2024**
RFP Closing Date: **April 4, 2024 2:00 pm,**
RFP Opening: **April 4, 2024 2:15 pm,**
Location of Bid Opening: **Ladysmith City Hall**

Question 1 – What prompted the Town to conduct this study?

Answer: The study has been on the Town’s capital list for several years. This last winter, a relatively small slough of the soil was observed, so the RFP was initiated.

Question 2 – Are there any utilities on 2nd Avenue and have they had any performance issues?

Answer: Yes there are utilities, see map below. There have NOT been any performance issues.

Question 3 – Are there any budget limitations for this project?

Answer: The Town’s budget is \$35,000.

Question 4 – What timelines need to be met for the design and/or construction of this project?

Answer: There is not a deadline for this work, although a reasonable length of time should be included in the proposal. Construction needs are not yet identified. If the results lead staff to recommend a capital project, it will be in the 2025 budget at the earliest, unless the findings were urgent.

Utilities: The map below illustrates the Town utilities in the area and the general alignment/ extents. For more detailed information please contact BC One Call or Maggie Robinson at mrobinson@ladysmith.ca.
